

Standardization Scaler (Z-Score)

Friday, 26 July 2024 2:16 PM

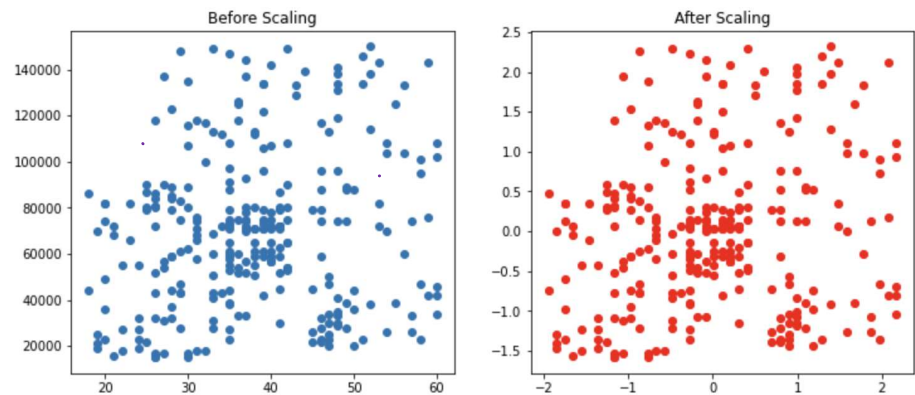

It will not affect by outliers

$$v' = \frac{v_i - \bar{A}}{\sigma_A}$$

where $\rightarrow$

$\bar{A} \rightarrow$ mean of Attribute

$\sigma_A \rightarrow$ standard deviation

Ex $\rightarrow$

$$\text{Salary} = 73600$$

$$\text{mean} = 54000$$

$$\sigma_A = 16000$$

$$v' = \frac{73600 - 54000}{16000}$$

$$v' = 1.225$$
